From Our Humble Beginning

IVY Wrought Iron Works was established in 1929 by an English blacksmith named Albert George Story. Many of his original tools are on display at IVY Classic Industries. Originally the name **IVY** was chosen as it was made up of three letters that were all straight lines. These straight letters could easily be cut into any **IVY** product before the company could afford a steel letter punch. Today **IVY Classic Industries** is still a family-owned-and-operated business continuing the traditions of Mr. Albert George Story.

IVY Classic is dedicated to manufacturing a comprehensive, high-quality line of power tool accessories and hand tools for the contracting, industrial and DIY markets. All our tools are subject to strict quality-control procedures to ensure they meet our exacting standards.

We Set Very High Standards

We Meet Your Needs

We continually update our package designs to help you effectively promote **IVY Classic** products. We use the latest in packing materials, and our product cards are bar coded and clearly labeled with valuable information to make any job easier.

We are very proud of our complete assortment of display merchandisers throughout the product line. Our merchandisers are carefully arranged to include the best-selling items in an organized, space-saving layout.

Zirconia Flap Discs Type 29 (Angled Design)

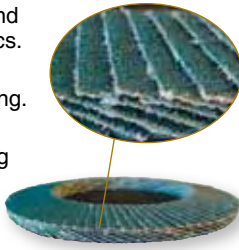

Flex-Abrasive®

Quality coated abrasives with superior cutting performance.

- Zirconia alumina discs last 20x longer and remove material 3x faster than resin discs.
- For metal fabrication, blending welds, deburring, cleaning, stripping and finishing.
- Combines the grinding capabilities of a depressed center wheel and the finishing characteristics of a fiber disc thereby eliminating the switching of tools.
- Angled design works at 10° - 25° angle.

5 per Box - each disc is also barcoded for individual sale.

■ Step Drills

- Produce perfectly round burr-free holes in materials up to 3/8" thick.
- Up to 13 conventional drill sizes on one bit.
- Lobular shanks won't slip in the drill chuck.
- Sizes are laser marked on the bit for easy hole size identification.
- Cone shape of the bit adds strength so there is no flexing of the bit while drilling.
- Economical and practical for electricians, auto mechanics, sheetmetal workers, and general contractors.

■ Fractional Sure-Start Step Drills

- Sure-Start point, fast penetration and accurate starting with no punch needed.

Quick-Change Power Shank

The Importance of Lobular Geometry

Our lobular design reduces the stripping of the corners of the nut. Fasteners are driven on their flat sides instead of their corners.

Extra Strength Magnet

An extra strength magnet results in greater retention of your fastener. Fewer dropped fasteners make your job faster and easier.
